

RELEASE

February 22nd, 2023, Veracruz, Ver.

To all our customers and users of the Port of Veracruz:

Since the beginning, CICE's name has been related to the modernization and development of the Port of Veracruz, Mexico's first port and a role model of growth for both our community and our country. Today, more than thirty years of effort and hard work are materialized with the positive resolution for the construction, operation and management of the Mixed Cargo Terminal in North Bay, for a 20 year period.

This Terminal will be developed on a total surface of 183,000 m², with a 550 linear meters waterfront for the operation of container cargo, break bulk and project cargo in 2 berthing positions, a 1,150 meters long railway, an electronic scale for trucks and railcars, as well as a 6,200 m² CFS warehouse and a 11,600 TEUs container yard.

All members of CICE are very proud and motivated with this opportunity to continue writing the history of Veracruz, and we acknowledge that this growth is the result of the vision of our shareholders, the trust given by our customers, in addition to the determination of each one of our employees; besides the collaboration of all the authorities involved, highlighting the remarkable leading role shown by ASIPONA Veracruz (Administración del Sistema Portuario Nacional de Veracruz) during this process.

In this new stage, we are confident that altogether with our customers, employees, suppliers and community members, we will be able to continue developing business opportunities for the benefit of our country, leading us to the achievement of our vision of becoming the most complete option of logistic solutions in Mexico in 2026.
